

Making WAVES

Deluxe Materials is delighted to announce Making Waves. This is a specially formulated, odourless, clear setting resin that is designed to hold its shape even on vertical surfaces. Thus it can be used to form waves, texture water surfaces to make ripples, waves and even waterfalls. It can also be coloured with water-based paints and is easy to clean up with water.

John Bristow International Marketing Manager said, "Our scenic range products are highly regarded for their fine quality and ease of use. Making Waves is the result of over 3 years development and testing and will make a valuable contribution to modelling waves, running water and even waterfalls; it's a great companion product to Solid Water, Scenic fibres and Scenic Water"

Making Waves is priced and £7.99 (100ml) and £12.99 (250ml)

MAKING WAVES MASTERCLASS

1. PREPARED RIVERBED READY FOR THE INTRODUCTION OF SOLID WATER

2. POURING IN THE PREPARED SOLID WATER. THIS TAKES ABOUT 24 HOURS TO SET

3. ADDING SCENIC FIBRES TO CREATE MOVING WATER AROUND ROCKS.

4. ADD A LITTLE WHITE ACRYLIC PAINT TO THE MAKING WAVES MATERIAL, THEN HOLDING THE CUT FIBRES SECURELY, PAINT ON THIS MIXTURE

5. WHEN FIBRES ARE DRY, CUT TO LENGTH AND ADD TO THE PREVIOUSLY PREPARED SOLID WATER RIVER BED.

6. ADD FIBRES AROUND ROCKS TO CREATE A SMALL WATERFALL

7. TO ADD A LARGE WATERFALL, ADD SPEED-BOND TO THE TOP LEVEL THEN ADD THE PREPARED FIBRES

8. WHEN SOLID WATER HAS SET, ADD MAKING WAVES TO CREATE SMALL RIPPLES

TIP: YOU CAN USE A COCKTAIL STICK TO FORM THE EFFECT OF MOVING WATER WITHIN THE WATERFALLS OR A BRUSH TO CREATE RIPPLES AROUND A FALLEN TREE

The Finished Project
